

FY 2023 Appropriations Request

It is critical that Congress fully funds the rural health safety net before the end of the calendar year. Long-term continuing resolutions (CR) are disruptive to day-to-day operations and cause uncertainty for programs rural providers rely on. In order to provide stability, NRHA urges Congress to pass a full-year, Fiscal Year (FY) 2023 appropriations bill as soon as possible.

Although current spending for rural health discretionary programs is relatively small, it plays a crucial role in strengthening health care systems in rural communities. To ensure rural providers can remain in their communities and supply the care needed, NRHA urges Congress to support the following funding requests to improve rural health care access and affordability:

Increase funding for the Medicare Rural Hospital Flexibility (Flex) Program to \$73.5 million in FY 2023. Flex Program grants are used by states to implement specific rural strategies to support small rural hospitals and ensure access to primary care in rural communities.

Establish an Office of Rural Health within the Centers for Disease Control and Prevention (CDC) funded at a level of \$10 million. Currently, there is not a devoted office to serve the needs of rural communities at the CDC. Such an office will lead, and coordinate, activities designed to improve public health and the health of rural populations.

Expand the Rural Residency Planning and Development Program by providing \$13 million in FY 2023. Expanding the Rural Residency Planning and Development Program is necessary to increase the number of rural residency training programs and number of physicians practicing in rural areas.

Increase funding for the United States Department of Agriculture (USDA) Rural Hospital Technical Assistance program to \$5 million in FY 2023. Expanding technical assistance of financial business strategies for vulnerable rural hospitals is essential to ensuring their continued viability and financial success.

Fund rural maternal health care programs at \$15 million in FY 2023. To improve rural maternal health outcomes, it is critical Congress fully funds the Rural Maternity & Obstetrics Management Strategies (RMOMS) Program at HRSA and the provisions of Rural Maternal and Obstetric Modernization of Services (Rural MOMS) Act included in the Consolidated Appropriations Act, 2022.

NRHA requests Congress provide \$10 million in funding for the Rural Health Clinic (RHC) Behavioral Health Initiative in FY 2023. Congress can address the unique behavioral health and workforce challenges affecting rural America by increasing the pool of behavioral health professionals practicing at RHCs in underserved communities through this new behavioral health initiative outlined in President Biden's budget request to Congress.

FY 2023 Appropriations Requests & Allocations
